

## FINANCIAL MANAGEMENT WITH TOMS

Ever heard of the saying, "Time is Money"? Time can be money if only you knew how to own it. The secret here is AUTOMATION. Automation can simply be achieved by the introduction of technology to business processes for increased efficiency and productivity. In today's world, it is impossible not to acknowledge the impact of technology in development and organizational growth.

While the most obvious benefit of technology is increased productivity, there are other benefits that can help growth and reduce costs.

### Would you like to increase your company's financial performance?

Are you worried about how to get accurate details on financial transactions in your organisation? The answer is TOMS. TOMS simply means The Office Manager Solution. TOMS has been developed to integrate your business processes and check out redundant activities that may be reducing the efficiency of your organization..

How then would TOMS be helpful? Amazingly TOMS is a suite of modules designed to achieve various operational activities within a projectized or office environment which includes the EXPENSE MANAGEMENT module. The Expense Management module has been created to allow you record and track all financial transactions on your projects.

With Expense Management, no matter the size of your organization, TOMS simplifies expense entry, streamlines review, eliminates paper pushing, and reduces administrative efforts across the organization and it is also easy to use. Because it's cloud-based, TOMS Expense Management Module can integrate with other systems and automatically create detailed expense reports.

Fraudulent or suspect spend patterns are easily detected on TOMS for further attention and investigation.

Would you like to find out more on how TOMS can be of help to your financial Management?

"When money realizes that it is in good hands, it wants to stay and multiply in those hands. "
